With thanks to South West  
Hampshire Beekeepers

# Hefting a hive

- Put a screw or eye into each side of the floor
- Make a link wire from an old metal coat hanger with a loop at either end
- Using luggage scales and the link wire weigh each side.
- Add the weights together to get the total weight.
- Including the roof etc., the total weight should be 28/30Kg  
60/65lbs
